Have you ever filed an application with us before? Yes No If yes, give year: _____

Type: Full-time Seasonal Permanent

Division as described below (If more than one, rank in order of preference – 1-highest, 5-lowest):

- ___ General Larval (April – September 30th)
- ___ Catch Basin (May – August 15th)
- ___ Off-Road Basin (May – August 15th)
- ___ Laboratory (May – September 30th)
- ___ Office (May – September 30th)

Do you feel you are able to perform the functions of the division(s) you have applied for as described below? Yes No If no, describe: _____

General Larval Division

This Division focuses on the inspection/treatment of all potential mosquito breeding sources other than catch basins. Two member crews equipped with motorized and hand equipment are responsible for inspecting all known potential mosquito breeding sites in an assigned area, and applying appropriate larvicide to those sources actually found breeding. Crews collect data on source condition, breeding density, larval samples, any treatment required, etc. This work involves lifting and carrying equipment up to 60 lbs. in weight, over extended distances of rough, uneven terrain to sources requiring treatment. Activities can result in extended exposure to sun and heat, along with exposure to poison ivy and many sources of hay fever pollen. Employees must be available to work two evenings per week in the Adult Mosquito Control Division, when necessary from July 1 to employee's specified end date. Employees may also be required to perform drainage/trail maintenance activities. This will involve physical labor using shovels, picks, rakes, hand saws, clippers, weed whackers, etc. The collection and handling of used vehicle tires may also be required. Employees will be required to pass a written, multiple-choice exam administered by the Illinois Department of Agriculture to obtain a Commercial Not-For-Hire Operator's License in the category of Mosquito Control. The District will provide required training and study materials to prepare for the exam. The exam will be taken after hiring, but before beginning actual mosquito control activities.

Catch Basin Division

This Division involves the treatment of curbside storm water catch basins for mosquito larvae control. Single member crews use right-hand drive Jeep type vehicles to access catch basins with driver dispersing a larval control briquet into each catch basin. Driver is responsible for treating all catch basins in an assigned area. Employee must have a good sense of direction and ability to read/understand maps. Employees must be able to sit and drive a right-hand drive vehicle for long periods at a time under stop-and-go driving conditions with subsequent braking/acceleration. Activities can result in extended exposure to sun and heat. Employees must complete the Solid, Single-use Larvicide Training Course conducted in-house, as required by the Illinois Department of Agriculture.

Off-Road Basin Division

This Division involves the treatment of off-road storm water catch basins for mosquito larvae control in walk-in areas not accessible to vehicles. Single member crews are responsible for treating all mapped off-road catch basins in assigned areas by dispersing larval control briquets into each off-road catch basin. Employees must have a good sense of direction and ability to read/understand maps. This activity involves walking extended distances over rough, uneven terrain carrying larval control briquets. Activities can result in extended exposure to sun and heat. Employees must complete the Solid, Single-use Larvicide Training Course conducted in-house, as required by the Illinois Department of Agriculture. On occasion, employees from this Division may be transferred to the Catch Basin Division to assist in their operations, with pay level corresponding to the Catch Basin Division.

Laboratory Division

This Division focuses on the collection and processing of data pertinent to various aspects of mosquito control. A combination of indoor and outdoor activities including sample collection and identification, sample testing, field data collection, post-larval treatment inspection, etc. are required. Duties will involve driving, and often walking over rough, uneven terrain. Significant time will be spent using a microscope and mosquito identification keys, preparation/testing of mosquito samples for West Nile Virus, and cleaning/maintenance of laboratory equipment. Biology oriented background preferred, but not essential.

Office Division

This Division focuses on clerical aspects of daily operations. Duties include answering incoming telephone calls and providing the caller with information requested when possible, or directing call to appropriate staff member. The ability to deal with irate callers through patience and courtesy is essential. Computer data entry of all field data collected is also the responsibility of this Division. Accurate typing skills and basic familiarity of computers are required. Secondary duties include contacting villages and libraries for distribution of informational handouts, as well as assisting in the laboratory division as needed.

Adult Control Division

This Division involves the application of ultra-low volume aerosol pesticide for the control of adult mosquitoes. Single member crews are assigned a vehicle with a mounted sprayer. The driver must follow a detailed spray route map while controlling the sprayer and driving safely. This requires the employee to be able to sit and drive the vehicle for 3-5 hours. Adult control operations are conducted from dusk to midnight, during the hours where adult mosquitoes are most active. Employees that work in this division will be drawn from the General Larval Division.

All employees will be hired for one primary Division to which the majority of employment time will be spent. A shift between Divisions may be made on occasion to meet various requirements of the current mosquito season. On such occasions, you will be paid the rate applicable to the Division you were transferred to instead of the rate for the Division you were hired for.

The use of tobacco products including vaping is not permitted at any time within District buildings or vehicles, and is only allowed in the field during break and lunch periods.

■ Employment Availability

Date Available: _____

For Seasonal, Last Day Available: _____

*****IMPORTANT: This must be filled in to be considered for employment*****

Are you planning to take vacation/time off during season? Yes No if yes, please describe:

I hereby certify that the answers given and statements made are true and correct. I hereby authorize all my previous employers, or references to furnish any information concerning my personal character or employment records. I hereby release all such persons from liability or damages incurred as a result of inquiry and furnishing this information. If hired, I agree to furnish documentation within 72 hours showing my identity and that I am legally authorized to work in the United States. I hereby authorize the District to check my driving record as it appears in the files of the office of the Secretary of State of Illinois.

I understand that false or misleading information given in my application or interview(s) may result in discharge. I understand, also, that I am required to abide by all rules and regulations of the District. In addition, I understand that I may be required to pass the written General Standards Examination as administered by the Illinois Department of Agriculture to obtain a Commercial Not for Hire Operator's License in the category of Mosquito Pest Control for employment with the District. Employees hired for the Catch Basin, Off-Road Basin, and Laboratory Divisions must complete the Solid, Single-use Larvicide Training Course, conducted in house, and required by the Illinois Department of Agriculture.

In the event of employment as a *Seasonal Employee*, I hereby understand and acknowledge that, unless otherwise defined by applicable law, any employment relationship with the District is of an "at will" nature, which means that the Employee may resign at any time and the District may discharge Employee at any time with or without cause. It is further understood that this "at will" employment relationship may not be changed by any written document or by conduct unless such change is specifically acknowledged in writing by an authorized executive of the District.

This application for employment shall be considered active for a period of time not to exceed 90 days. Any applicant wishing to be considered for employment beyond this time period should inquire as to whether or not applications are being accepted at that time.

SUPPLEMENT TO APPLICATION FOR NEW SEASONAL EMPLOYMENT - 2019

Please complete **all sections** of the employment application. All information is necessary to process the application.

Base wage scales for Divisions summarized in employment application are:

General Larval Division	\$ 16.00 /hr
Catch Basin Division	\$ 13.00 /hr
Off-Road Basin Division.....	\$ 14.00 /hr
Laboratory Division	\$ 14.00 /hr
Office Division	\$ 13.00 /hr

All employees who remain in District employment **through the date specified by them on their employment application**, and meet all other qualifications including employment length/allowed absence criteria as defined in detail within the *Seasonal Employee Personnel Information Handbook* (issued upon start of actual employment) will be eligible for a monetary wage bonus summarized below:

<u>Operational Division</u>	<u>Employment Length Minimum Threshold</u>	<u>Allowed Absence Total Elective Excused+Unexcused</u>	<u>Wage Bonus</u>
Catch Basin	320 Hrs (8 Weeks)	16 Hrs	+ \$ 1.00/Hr
Off-Road Basin	320 Hrs (8 Weeks)	16 Hrs	+ \$ 1.00/Hr
General Larval	480 Hrs (12 Weeks)	24 Hrs	+ \$ 1.00/Hr
Laboratory/Office	480 Hrs (12 Weeks)	24 Hrs	+ \$ 1.00/Hr

For elective excused and unexcused absence totals *exceeding* the allowed absence totals, a *reduction* in the monetary wage bonus will be made as follows:

<u>Absence Above Allowed Totals</u>	<u>Wage Bonus Reduction</u>
0.1 - 8.0 Hrs	- \$ 0.25/Hr
8.1 - 16.0 Hrs	- \$ 0.50/Hr
16.1 + Hrs	- \$ 1.00/Hr (Full loss of bonus)

Compensation for the wage bonus will be made by check issued in addition to your last pay check for the season, and be subject to applicable withholding taxes.

All employees will be hired for one primary Division to which the majority of employment time will be spent. A shift between Divisions may be made on occasion to meet various requirements of the current mosquito season. On such occasions, you will be paid the rate applicable to the Division you were transferred to instead of the rate for the Division you were hired for. Any evening contingency adult mosquito control operations will have a fixed rate of \$20.00/hr.

New employees *may be required to pass* a written, multiple-choice examination administered by the Illinois Department of Agriculture to obtain a Commercial-Not-For-Hire Operator's License in the category of Mosquito Control. The District will provide required training/materials to prepare you for the exam. The exam will be taken after hiring, but before you begin any actual mosquito control activities. The District will assume applicable spray license fees.

The use of tobacco products, including vaping, are not permitted at any time within District buildings or vehicles. Tobacco use will only be permitted during break and lunch periods.
